RESEARCH INTERESTS

Complex adaptive systems in control systems engineering and behavioral science: distributed algorithms, computational agent-based modeling, hybrid dynamic systems, decentralized decision making, emergence and self organization, amorphous computing, autonomous systems, control, communications, verification, cooperation, optimization, game theory, resource allocation, parallel computation, robotics, energy systems, sustainability in the built environment, behavioral ecology, engineering education, bio-mimicry and bio-inspiration

EDUCATION

Instituto Superior Técnico (IST), Portugal
École Polytechnique Fédérale de Lausanne (EPFL), Switzerland

IST-EPFL Joint-Doctoral Program Ph.D., Electrical and Computer Engineering,
April 2023

- Thesis Topic: *Non-verbal Communication between Humans and Robots: Imitation, Mutual Understanding and Inferring Object Properties*
- *Summa cum laude*, Pass with Distinction and Honour
- Advisers: Professor José Santos-Victor, Professor Aude Billard

Instituto Superior Técnico (IST), Portugal

M.S., Electrical and Computer Engineering, August 2016

- *Cum laude*, 16/20
- Thesis Topic: *Multi-UAV Mission Coordination using Signal Temporal Logic Specifications*
- Adviser: Professor Pedro U. Lima
- Area of Study: Systems, Decision and Control

B.S., Electrical and Computer Engineering, August 2014

- Systems, Decision and Control specialization (emphasis on control, modelling and simulation)
- Minor in Computers (programming and algorithms)

REFEREED JOURNAL PUBLICATIONS
